Rain Garden Training

A practical half day short course for landscapers, designers, maintenance care providers and volunteers

Rain gardens are vegetated areas designed and built to accept stormwater runoff from surfaces including rooftops, roads and compacted soils. Rain gardens are increasingly being used by homeowners and municipalities to reduce the impact of stormwater on local waterways and the Long Island Sound.

WHEN?

Saturday, November 8, 2014
9:00 am—12:30 pm

WHERE?

Central High School
1 Lincoln Blvd.
Bridgeport, CT
